DETAILED ACTION

Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- | | |
|------------|--|
| Group I, | claims 1-5, 41, 42, 46, 50, 77, 82, and 83, drawn to avirulent <i>Mycobacterium marinum</i> , a method of making, and a method of use. |
| Group II, | claim 81, drawn to antibody against an <i>Mycobacterium marinum</i> polypeptide. |
| Group III, | claims 6-10, 19-25, 43, 45, 47, and 84-89, drawn to avirulent <i>Mycobacterium tuberculosis</i> , a method of making, and a first method of use. |
| Group IV, | claim 80, drawn to antibody against an <i>Mycobacterium tuberculosis</i> polypeptide. |
| Group V, | claim 79, drawn to method to identify an <i>M. tuberculosis</i> viability reduction agent. |
| Group VI, | claim 78, drawn to <i>M. marinum</i> DNA. |

Art Unit: 1645

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of Group I is avirulent *M. marinum*, of Group II is antibody to a *M. marinum* polypeptide, of Group III is avirulent *M. tuberculosis* and a first method of use, of Group IV is antibody to a *M. tuberculosis* polypeptide, of Group V is a second method of use of *M. tuberculosis*, and of Group VI is isolated DNA.

Election of Species

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

First Species election: SEQ ID Nos:4, 13, 23, 25, or 31

Second Species election: *M. tuberculosis* gene Rv0822c, Rv3137, Rv2348c, 008381, Rv2181, Rv1954c, Rv0987, Rv3268, Rv2610c, Rv0405, Rv1664, Rv1662, Rv2946c

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 1645

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

First Species election: 5, 41, 42, 46, 77, 78, 81, 82, 83,

Second Species election: 9, 10, 19-25, 43, 44, 47, 79, 80, 85-89

The following claims are generic: 1-4, 6-8, 45, 50, 84.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each species is drawn to a different gene.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney P. Swartz, Ph.D., whose telephone number is (703) 308-4244. The examiner can normally be reached on Monday through Thursday from 5:30 AM to 4:00 PM EST.
